In connection with the provision of services, personal data may be disclosed to external entities only to the extent necessary to achieve the purpose of processing, in particular to:

- event organisers, in order to enable the proper organisation and execution of the event;
- entities cooperating with the Administrator or the organiser in the field of ticket distribution, in particular entities holding a dedicated ticket pool intended for a specific group of persons (e.g. employers, event partners, sponsors, local government units or other institutions);
- banks and payment operators;
- entities providing accounting, legal or audit services;
- courier or postal companies;
- entities providing IT, hosting or marketing services;
- public authorities or other entities authorised under applicable law.

a. Transfer of data in connection with a dedicated ticket pool

Where a specific pool of tickets is intended for a designated entity (e.g. an event partner, employer, sponsor or local government unit), the Administrator may transfer to that entity personal data of persons who purchased tickets from that pool. The data are transferred only to the extent necessary to verify entitlement to use the dedicated ticket pool and for the proper organisation of the event.

The scope of the transferred data will include:

- name and surname;

11. DATA RETENTION PERIOD

We process and store your personal data only for the period necessary to fulfil the purpose of their storage or for as long as this is required of us under law or regulations. As soon as the purpose ceases to apply or is fulfilled, your personal data will be erased or their processing will be restricted. Where processing is restricted, such data will be erased as soon as the data retention periods imposed by law, the company agreement/statute or contractual provisions no longer prevent such erasure, provided that there is no reason to assume that such erasure would threaten legitimate interests and provided that such erasure would not require disproportionate effort due to the particular nature of storage. Data processed in connection with the purchase of tickets may be stored for the period necessary to execute the event and until the expiry of limitation periods for claims arising from the concluded ticket sale agreement or from applicable law.

12. SECURITY OF YOUR DATA

SZTOLDO.PL Spółka z ograniczoną odpowiedzialnością Spółka komandytowa uses the SSL protocol to protect Customers' personal data. An SSL certificate is a tool that encrypts data transmitted electronically between the server and the user in order to prevent confidential data from being intercepted. An SSL certificate confirms the credibility of the website and helps ensure that the user connects to the correct service. In matters not regulated by this Policy, the provisions of Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC, shall apply. In the mobile applications, communication with the server takes place exclusively via an encrypted HTTPS connection, and user session data is stored in the secure storage provided by the device's operating system.

13. TRANSFER OF DATA OUTSIDE THE EUROPEAN ECONOMIC AREA

As a rule, personal data are not transferred outside the European Economic Area. If the Administrator uses IT tools provided by entities established outside the EEA, data may be transferred outside the EEA only with the application of appropriate safeguards required by the provisions of the GDPR. This applies in particular to Google services (Firebase) used by the KupBilecik application.

14. MOBILE APPLICATIONS

The Controller provides two mobile applications: **KupBilecik**, intended for ticket purchasers, and **KB Organizer**, intended for event organisers cooperating with the Controller under an agreement. To the extent not regulated in this section, the remaining provisions of this Privacy Policy shall apply.

a. Data processed in both applications

- account data: first and last name, email address, telephone number and account identifier,
- push notification token together with the device type,
- diagnostic data transmitted in the event of a crash or malfunction: error description, application version, device operating system and the identifier of the logged-in user.

The legal basis for the processing is the performance of a contract for the provision of electronic services (Article 6(1)(b) of the GDPR) and the Controller's legitimate interest in ensuring the security and proper functioning of the applications (Article 6(1)(f) of the GDPR).

b. Data processed exclusively in the KupBilecik application

- order and ticket history, as well as preferences, including selected event categories and cities,
- device location, if the user grants permission in the device settings, for the purpose of suggesting nearby events; this permission may be withdrawn at any time in the device settings without affecting the other functions of the application,
- when signing in via Google, Facebook or Apple: the email address and name provided by the selected provider, solely for the purpose of creating or authenticating the user's account,
- application usage data collected by Google Firebase Analytics, including the app instance identifier and application launch and session events, for the purpose of measuring application stability and how the application is used, based on the Controller's legitimate interest (Article 6(1)(f) of the GDPR).

Payments are processed by a payment service provider; the Controller does not receive payment card details. The selection of a parcel collection point takes place in a window provided by the courier service provider and embedded in the application, in accordance with that provider's privacy policy.

c. Data processed exclusively in the KB Organizer application

- company account data: company name, address, postal code, city and province,
- data of employees for whom the organiser creates subordinate accounts: first and last name, email address and telephone number; the organiser is responsible for informing such persons about the processing of their personal data by the Controller,
- the content of an account deletion request.

The application does not contain any analytics, advertising or tracking tools. The camera is used solely to scan ticket codes at the entrance to an event; the image is processed locally and is not transmitted. Only the scanned code is sent to the Controller.

d. Tracking

Data from the applications is not linked with data from applications or websites other than KupBilecik for advertising purposes and is not disclosed to data brokers.

e. Account deletion

A user may delete their KupBilecik account independently via the customer panel in the account settings. An organiser's account is deleted upon a request submitted through the KB Organizer application under Settings > Account deletion. The request is confirmed and processed by the Controller's team. The deletion is not carried out automatically because the organiser is bound by an agreement with the Controller and the same device may be used as a ticket scanner during an ongoing event.

In both cases, an account deletion request may also be submitted via the contact form, by email to kontakt@kupbilecik.pl, or at: <https://www.kupbilecik.pl/en/delete-account/>
